PROFESSIONAL SUMMARY

Software Engineering student (Application Development) at CPUT, finishing up in 2027, who spends more time building things than talking about building them. Have shipped full stack apps in React, Next.js, Java/Spring Boot and Laravel, connected to real databases, not tutorial projects. Also spend time doing hands on IT field work: routers, networks, hardware, actual clients with actual problems. Looking for a role or opportunity where I can put that same energy into real, practical work.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Java, Python, PHP, SQL, HTML, CSS
- Frameworks & Libraries: React, Next.js, Node.js, Express, Spring Boot, Laravel, Angular, Bootstrap, Tailwind CSS
- Databases & Backend Services: MySQL, PostgreSQL, Supabase, JPA/Hibernate
- Networking & Hardware: Router configuration, Wi-Fi installation & troubleshooting, network diagnostics (Fing), PC builds, hardware repair
- Tools: Git, GitHub, VS Code, IntelliJ, Cursor, Figma, Postman, Vercel

PROJECTS

PracticeFlow CRM: Medical Practice CRM (6-person team project)

Next.js · React · TypeScript · Tailwind CSS · Supabase

- Worked as part of a 6-person team to build a full-stack CRM handling patient management, appointment scheduling, and staff admin.
- Built out frontend features in Next.js/React/TypeScript, hooked up Supabase for auth and the database side of things.
- Deployed a real working app and got hands-on with Git across a codebase with multiple people pushing to it at once.

GitHub: github.com/aidan-g-barends/practiceflow-crm | Live: practiceflow-crm-iota.vercel.app

MediTicket 2: Healthcare Practice Management Platform

Java · Spring Boot · JPA/Hibernate · MySQL

- Built a full-stack backend for a healthcare platform connecting patients, doctors, and staff, using Domain-Driven Design and proper OOP structure instead of just throwing code together.
- Handled appointments, digital tickets, payments and notifications, split cleanly across separate frontend and backend repos.

Frontend: github.com/AidanBarends/MediTicketApp | Backend: github.com/AidanBarends/MediTicket2

The HairBra: Barbershop Booking & E-Commerce Platform

React · Supabase · Tailwind CSS · Payment Integration

- Built a customer-facing platform with appointment booking, barber profiles, and a proper e-commerce store with online payments built in.
- Set up the database in Supabase to handle bookings, products and transactions all in one place.

Die Strandloper: Restaurant Business Website (Real Client)

HTML · Tailwind CSS · JavaScript

- Built a multi-page site (Home, About, Menu, Gallery, Contact) for an actual local restaurant that needed a proper online presence.
- Hooked up a live contact form with Web3Forms so customer messages land straight in their email, no backend needed.

EXPERIENCE

IT Field Technician, CraythorneIT

Aug 2025 – Jan 2026, Jul 2026 – Present

- Perform Wi-Fi assessments, installations, and configurations for residential and business clients.

- Troubleshoot network connectivity issues and diagnose devices on-site using Fing.
- Configure routers and maintain client networks, responding to and resolving outages.
- Carry out PC builds, hardware repairs, and system upgrades for clients.

Other Experience: Waiter (Cape Town Fish Market), Barman (Die Strandloper), Classroom & Music Assistant (Longacres Private School), Background Actor (39 Steps Agency), Lifeguard (NSRI), 2022 to 2025. Different worlds, but all of them taught me the same things: show up, deal with people properly, and stay reliable when things get busy or stressful.

EDUCATION

- Diploma in ICT: Application Development, Cape Peninsula University of Technology (CPUT), 2024 to present, expected completion 2027
- National Senior Certificate (NSC), Hopefield High School, 2018 to 2022

CERTIFICATIONS

- The Complete Web Development Bootcamp, Angela Yu (Udemy)
- 4IR Digital Skills Training Programme
